SUMMARY

Curious and creative developer with a foundational strength in computer science principles. My focus is on writing clean, efficient code and architecting seamless user experiences. I am energized by collaborative environments and am eager to contribute to a team that builds meaningful, well-engineered products.

WORK EXPERIENCE

APPLICATION DEVELOPER INTERN, ROOMAN TECHNOLOGIES | [LINK](#)

SEPTEMBER 2024 – FEBRUARY 2025

Built and deployed full-stack apps using React.js, Node.js, Express.js, and MongoDB, including an e-commerce site and RESTful APIs.

WEB DEVELOPMENT INTERN, INTERNPE | [LINK](#)

AUGUST 2024 - SEPTEMBER 2024

Worked as a Web Development Intern, where I learned and applied HTML, CSS, and JavaScript to build four responsive mini projects that strengthened my front-end development skills.

SKILLS

Languages: C, Java, Python, OOPS

Web Technologies: HTML5, CSS3, JavaScript, REST APIs

Database: MongoDB, SQL

Tools & Cloud: Git, GitHub, Docker, Excel

PROJECTS

Poultry Farming System | [SQL](#), [HTML](#), [CSS](#), [DBMS](#)

- Developed a Poultry farming system application using HTML and CSS for the frontend, providing a user-friendly interface for efficient bank code search and retrieval.
- Implemented backend functionality using PHP and MySQL, ensuring robust data management and seamless integration with the XAMPP server for reliable connectivity.
- It streamlines inventory, orders, and customer interactions with an easy-to-use interface.

Mongoose-Powered Chat Application | [MongoDB](#), [EJS](#), [SQL](#)

- Built a WhatsApp-like chat application using Node.js, Express.js, and MongoDB (Mongoose) with CRUD operations.
- It supports CRUD operations, message editing/deletion, and real-time rendering with efficient database handling.

Wanderlust (Travel App) | [Full-Stack MERN Project](#)

- A MERN stack travel app where users can browse and book stays through a responsive home page with search and filters.
- Authenticated users can list, edit, and manage their own properties, while each stay has a detailed page with booking options.
- Built with React, Axios, and RESTful APIs, it ensures smooth navigation, secure JWT-based login, and efficient CRUD operations.

EDUCATION

Don Bosco Institute of Technology

Bachelor of Engineering in Computer Science; CGPA: **9.00**

2021-2025

Bengaluru, Karnataka

CERTIFICATES

[SQL](#) | [LINK](#)

Gained hands-on experience with database queries, joins, subqueries, CTEs, and data manipulation using MySQL.

[FULL STACK WEB DEVELOPMENT \(MERN STACK\)](#) | [LINK](#)

Gaining expertise in React, Node.js, MongoDB and backend development with Express.js. Built full-stack applications featuring JWT authentication, RESTful APIs, and responsive front-end designs.

[DOCKER FOR BEGINNERS](#) | [LINK](#)

Gained Docker proficiency by containerizing applications, managing images, and orchestrating deployments, enabling efficient development-to-production workflows.
